PROFILE

Results-driven Product Manager with experience in 0→1 launches, growth, analytics, and cross-functional execution across B2C digital products. Skilled in product strategy, roadmap planning, stakeholder management, and data-driven decision making, with hands-on expertise in Python, SQL, AI, and Machine Learning.

PROFESSIONAL EXPERIENCE

Associate Product Manager, Times Internet (TOI)

Jan 2025 – Present

Newsletters

- Identified content consumption gaps, owned newsletter strategy and execution across TOI properties for **1M+ subscribers**, averaging **90K opens**; improved TOI Top 10 open rates from **1.8% to 41%** through experimentation and segmentation.
- Launched 10+ newsletters from 0→1, including covering planning, templates, automation, userbase selection and distribution & Tracked engagement KPIs via dashboards, improving CTR and engagement by 2.5×.
- Built AI-generated newsletter workflows for design, content and production, reducing manual effort and turnaround time.

Community Platforms (Times Parenting & TOI Women)

- Led product initiatives to build engaged communities, increasing user participation by **45%+** through features like **Ask the Expert**, forums, polls, and webinars
- Improved repeat user engagement by **28%** via interactive content formats and feedback-driven iterations
- Increased logged-in user engagement by **2×** in 4 months, supporting **65% retention** through personalized experiences

AI-Powered FAQs

- Analyzed TOI search behavior and identified that **30%+ of queries were informational**, while recency-driven ranking limited contextual content discovery.
- Conceptualized and launched an **AI-powered FAQ experience** using RAG architecture, embeddings, and grounded content generation to provide 360° context directly within articles.
- Achieved **4% CTR** on AI-generated content and **2.5× session duration**, laying the foundation for semantic search capabilities and the broader Times IQ GenAI suite.

TOI Games (Analytics & Growth)

- Improved TOI Games retention by **15–20%** through analytics, cohort analysis, and gameplay optimization and Analysed acquisition funnels and behavioural data using GA4, driving **20% improvement in user activation**
- Implemented feedback-driven iterations and engagement studies to improve gameplay experience and user participation

Young Leaders Kids Masterclass — B2C EdTech Platform

- Led end-to-end execution of a multi-course EdTech initiative, covering product development, website creation, campaign strategy, enrollment workflows, operations and lead funnels to drive student acquisition and improve conversions.
- Managed mentor onboarding, student communication, and post-purchase engagement across multiple cohorts.
- Enrolled **250+ students** and generated **30L+ revenue** through digital campaigns, outreach, partnerships, and conversion optimization.

Product Growth Initiatives

- MyProfile :Leading development of a personalized profile experience to improve user engagement and retention
- Spearheaded the 0→1 launch of **spanish.itimes.com**, owning user-research, PRDs, execution, monitoring, resulting in a **7× increase in indexed pages within 2 months**

Software Engineer Intern, JPMorgan Chase & Co.

Jun 2024 – Sep 2024

- Stabilized development environments enabling consistent builds across teams and built real-time financial data visualizations using Perspective library

Intern Trainee, DRDO

Dec 2023 – Jan 2024

- Applied AI techniques to aerospace systems research & Built predictive maintenance models improving operational reliability

PROJECTS

Vogue Vision — Hybrid Apparel Recommendation System

Published — IEEE Conference on Artificial Intelligence (CAI), 2025

- Built hybrid recommendation engine combining collaborative filtering and CNN-based visual embeddings
- Used ResNet to extract 2048-dimensional image features from a dataset of **44K+ fashion images**
- Implemented KNN with cosine similarity to generate personalised recommendations
- Addressed scalability challenges using pruning, quantisation, and mini-batch training

EDUCATION

Netaji Subhash University of Technology (NSUT)

2021 – 2025

B.Tech — Electronics & Communication Engineering (AI & ML)

CGPA: 8.63

SKILLS

Product Management: Product Strategy, Roadmapping, PRDs, User Stories, Feature Prioritization, Product Lifecycle Management, Stakeholder Management, Agile Methodologies, 0→1 Product Launches, PRDs

Analytics & Data: SQL, GA4, Google Search Console, A/B Testing, Funnel Analysis, Cohort Analysis, KPI Monitoring, Reporting Dashboards, User Behaviour Analysis, Data-Driven Decision Making

AI / ML: Recommendation Systems, CNNs, ResNet, Computer Vision, Prompt Engineering, LLM Applications, AI Workflow Automation, Personalization Systems

Tech: Python, SQL, JavaScript, React.js, TensorFlow, Git, GitHub, REST APIs, Figma
